

PRACTON MINING SERVICES PTY LTD

Practon Mining Services was established in 1989 and has grown to be one of the most unique valve specialists in Australia.

We are a totally family owned and managed company adhering to traditional values and business ethics.

Our dedicated team of expert staff is on hand to help with any enquiry on sales of new valves, new valve components, modifications and repairs of used valves.

Our workshop section comprises of a wide range of machining facilities. We welcome any inquiry you may have and always welcome comments or suggestions from our clients.

EXTENSIVE RANGE

Our extensive range includes knife gate valves, ported gate valves, butterfly valves, concentric plug valves and ball valves, electronic and mechanical flow meters, pneumatic and electric actuators, control valves and positioners.

We pride ourselves on our ability to source those hard to find items in the processing industry.

Practon Mining Service proudly provides a vital service to industries such as Mining, Processing, Manufacturing and Marine. When special items outside of our standard range are required, they can be manufactured at short notice utilizing our local engineering facilities.

FAST RELIABLE DELIVERY

Our large off the shelf availability of valves, components, engineering facilities, efficient staff and reliable delivery service, ensures that most orders can be delivered in the Metro area on the same day.

Our country and interstate clients will have their orders at the depot of choice, the same day also.

QUALITY GUARANTEED

Our Quality Management System assists us in providing our clients with an outstanding level of service and guarantees that our products are supplied to the highest possible standard.

Practon Mining Service will only source products from reputable local, interstate and international manufacturers. During inspection and testing procedures, strict guidelines are adhered to, ensuring that our guarantee of quality is maintained.
